1. Open the Camera on your phone.
2. Hold your device over a QR Code so that it's clearly visible within your smartphone's screen.
3. Two things can happen when you correctly hold your smartphone over a QR Code:
   A. The phone automatically scans the code.
   B. On some readers, you have to press a button to snap a picture.

   Presto! Your smartphone reads the code and navigates to the intended destination, which doesn't happen instantly. It may take a few seconds on most devices.
